dien-1 control statement repeatedly executes a set of statements, answer - Iterative @ Deduce the output of the tocoming code if take and false Punt (" And operation") as were - + (B) as obsidious elit Truc or false: (" anitherage so ") tain? Oak: Pront ("Default cost") 3) Predict the output of the following cools the season on south - 3- 1 Print UN 1402 (4) which beyond is used to take the control to the beginning of the Lunga onswer - () continue 1 The step argument in range () function answer - malicates the difference between every two consecutive numbers in the sequence @ The symbol that is placed at the end of it condition is. avenu -> (:) @ what is the keyword that is used to come out of a loop only for that iteration ? answer - + (5) continue

3) Judge the output of the following cools enippet.
too i in range (10): 16 10 - 5: break tise: Print (i)
3 Predict the output of the Following code snippet.
Print (Frac) answer - a True
The output of the below expression is
200 (1/6), answer B) Zero Division Error
on sweet - @ Move of
onswer - or when no exception -
a) when an is the finally block executed ?
a) when an ar a sold block executed of
b) when an exception occurs
e) only if some a exception
c) only if some condition that has been specified is satisfied always answer and olways
19 The her word that.
The key word that is not used as an exception he handling in python ?

Lo 1905") To An exception is

answer - a @ Aobject

whether an exception is thrown or not?

answer - @ Finally

Predict the out put of the foolowing code snippet.

While True

Print ("Hello: world")

Answer - a syntax Error

و جنگ درفط اول (٥) مزار

- (18) hauge the output of the following statement?
 int ("68,43") Answer D value error
- 13 the error that is not a standard exception in python
 Brower B Assignment Error
 - 3 The Function that generates sequence of numbers which can be iterated through

onsurer a B rangel

- Downst is the output of the following code snippet of

 K= abold

 For i in X:

 Print(i)

 Answer +(a) a book
- 22) The function of while loop is

answer - Regret a chunk of coole until a condition is false
